How to Use on Android & iOS?

The Main Screen, which comes after the Application Welcome screen, is the basic screen where application operations can be performed. There are 3 buttons on this screen;

In the upper left part	A button that allows us to change the visibility of the front or rear camera on the screen
In the upper right part	A listing screen that looks like an Excel button
In the lower middle part	A button that allows you to turn the phone's flash on and off.

On the home screen, the camera is always ready to read the QR code.

Main Screen

| The purpose of using the front and back camera switching button; |
| --- |
| It was produced to enable personnel using the application to read the QR Code with either the front camera or the back camera, and to switch between the front and back cameras. |

The purpose of using the listing button;
Access is provided to the screen that includes a search bar and a listing screen that lists participants who have registered via the form on the web page, allowing participants on the list to be quickly found via instant search, excluding manual querying.

QR Code reading process and actions taken;	
If the QR code sent to the participant via e-mail is read for the first time;	The progress bar screen appears, and the "Cancel" button can be clicked to cancel the query. If the query is successful, the Participant information is displayed on the Details page that opens at that moment.
If the QR code sent to the participant via e-mail is read for more than the first time;	"QR has already been read" warning is shown on the screen as an alert.
In case an incorrect QR code is read while the internet is available;	"There is an error in the service right now (101,102,…106), use the current list to check." warning is displayed
In case an incorrect QR code is read without internet;	"Connection error, use updated list to check" warning is displayed
If the device does not have an internet connection while reading the QR code;	"Connection error, use updated list to check" warning is displayed
In case an error occurs while retrieving data from the service	"There is an error in the service right now (101,102,…106), use the current list to check." warning is displayed

Listing Screen

Listing is performed on this screen in 2 different situations.

If there is internet	Data is currently retrieved from the service and listed. Data retrieved into the application's cache is also recorded.
If there is no internet	In order to search the list when there is no internet, when you enter this page when there is internet, the cached data will be listed. If there is no internet, the Wifi Off icon will appear in the upper right corner of this page. If there is internet, this button will not appear.

Within the list, instant search/filtering operations can be performed by Name, Name Surname, Email address and easily search for participants.

When the list elements are clicked, the Detail page opens, showing the Participant details.
